

Document type	Technical Data Sheet
Name	MICA SILVER
Description	Small flakes of silver natural mica. It can be added to any medium to coarse-grain lime or cement-based plaster to obtain special decorative effects.
Composition	Mica flakes coated with titanium dioxide, iron oxide and tin oxide
Grain size	400 – 1200 µm
Appearance	Silver flakes
Packaging	150 g polyethylene packaging
Application	Pour all the contents of the jar into a 24 kg bucket and mix until complete dispersion. This is the amount that at our discretion is the right one, but you can increase at will. Max operating temperature: 870°C.
Where to use it	It can be added to all STUCCO ITALIANO lime or cement-based decorative plasters
Consumption	Recommended: 150 grams per every 20-24 kg of decorative plaster
Shelf life	24 months when stored according to the recommended guidelines
Storage	In original sealed packaging between 5° and 35°C in a dry, dark environment
Safety Norms	Do not swallow. It is important to adhere to the prevailing safety and hygiene standards while using it. Always keep the product out of reach of children. In the event of ingestion seek medical assistance without delay and present the container or label.
Disposal	Product must be disposed of according to norms and regulations in force. Follow directions on the packaging.
Application Instructions	<p>MICA SILVER is a remarkable addition to floor and wall coatings, enhancing their appearance with shimmering silver flakes. This product can be mixed with the plaster in the final coat, with an approximate ratio of 150 grams per 24 kg of plaster.</p> <p>Silver MICA is compatible with various plaster types, including Venetian Plaster, MARMORINO, as well as flooring plasters such as PASTELLONE and REINFORCED MICROCEMENT.</p> <p>It is chemical and abrasion resistant, ensuring long-lasting durability. It adds slip-resistant properties to the floor finish. It is an excellent choice also for environments that experience heavy use.</p>
