MADE IN ITALY, FOR THE WORLD

AN ARTISANAL COMPANY

The company was founded in 1999 by maestro Giovanni Polistena, an artisan that has dedicated his life to reviving and teaching the decorative techniques of the Italian heritage.

Since its establishment Stucco Italiano has specialised in manufacturing decorative finishes for walls and floors. Based in the Region of Venice, cradle of Italian craftsmanship and architecture, Stucco Italiano places great emphasis on using historical materials like lime and marble and on prioritising natural and sustainable ingredients.

Today, we export to over 30 countries where we are known for the quality of our products and the support we provide to our customers. Despite the company's growth, Stucco Italiano continues to embody artisanal characteristics. We source raw materials from Italy and we are the only company in the industry that maintains the tradition of producing its own lime.

AN EVER-EVOLVING LINE

DECORATIVE FINISHES

For over twenty-five years, Stucco Italiano has operated internationally, drawing its expertise from a background in architectural restoration. Since 1999, the company specialises in decorative finishes for walls and floors grounded in authentic mineral systems, with a consistent focus on lime and marble.

Our range evolves from a deep technical knowledge in natural materials, enabling a wide variety of finishes that adapt to diverse architectural environments: from refined, contemporary interiors to classical, urban, organic, and minimalist aesthetics.

EXCLUSIVE, ETERNAL, ECO

MINERAL PLASTERS

At the core of Stucco Italiano's offer lies our line of natural lime and marble-based plasters inspired by the Italian tradition of decorative finishes. The natural elegance of mineral plasters combines durability with design solutions for every type of surface.

MINERAL PLASTERS

Lime and marble-based wall finishes

In these decorative materials, the Italian artistic heritage finds a renewed expression.

Historical building materials such as lime and marble are combined with modern technologies to reinterpret tradition. The natural elegance of mineral plasters marries durability with design solutions for every type of surface. From the walls of private homes to high traffic spaces; interior, exterior or wet areas.

The wide range of finishes and effects achievable with these products means that tackling any decorative project aimed at creating inspiring and exclusive surroundings with durable, eco, high quality materials is possible.

DECORATIVE PAINTS

Contemporary finishes for expressive wall surfaces

The contemporary finishes in this product line effortlessly bring a sense of style and elegance, offering easy application with brush, spray or trowel.

By combining acrylic binders with diverse raw materials like real powdered metal, glass microspheres or pearlescent micas, a wide spectrum of possibilities is crafted to accommodate diverse environments; whether they be modern, vintage or artistic; delicate, precious or bold.

Common attributes of all these finishes are the simplicity of application and a generous allowance of decorative versatility facilitating boundless creative expression.

FLOOR COATINGS

Mineral plasters for seamless floors

Stucco Italiano presents a carefully developed collection of floors coatings, valued for their authentic mineral composition.

We have drawn inspiration from the architectural floor finishes of the Venetian tradition such as Pastellone and Terrazzo and incorporated innovative materials like non-hydraulic cement and hydraulic lime.

In this way we have developed ground-breaking formulas that seamlessly blend the elegance of the Italian legacy with the durability and aesthetic requirements of contemporary lifestyles.

Products

01

Reinforced microcement

An elegant flooring solution combining quartz, marble and cement with epoxy for added strength, offering versatility for various decorative effects.

03

Pastellone

Cement-based wall-to-floor plaster. This seamless finish is ideal for minimalist spaces and areas where natural materials and simple lines are desired.

02

Eco terrazzo

As thin as 6 mm, as hard as marble. This compound creates stunning Terrazzo floors that represent a mineral and completely eco-friendly alternative to Portland cement.

Complementary Products

Ancillaries

A unique feature of Stucco Italiano is its **vast range of complementary products** that enhance or improve the performance of the decorative finishes.

Some of these products are developed to solve the challenges that artisans commonly encounter on the worksite or to facilitate the application of our decorative plasters. Other products are designed to **add special effects** and customise the finishes, or to provide them with the **best protection**.

Tools

We include in our product offering an **exclusive choice of tools of the trade**. Drawing on our extensive artisan experience, we have handpicked tools from the Italian market that possess superior qualities, ensuring an effortless and refined application of our plasters and paints.

Colour System

Our Colour Chart encompasses a **selection of 140 hues**, in which all our off-white materials can be tinted. Accompanying our chart is a **user-friendly app** compatible with all devices, allowing you to access formulations for our entire range of colours and +1300 colours from competitors' palettes. We also offer a dedicated **software for tintometric machines**.

PLASTERING COURSES

STUCCO ACADEMY

In our field, achieving an aesthetic and durable finish requires a deep understanding of the materials.

For this reason, every year we train numerous artisans at our school in the province of Vicenza, Italy.

Our courses cater to all experience levels, guiding beginners in basic techniques and allowing skilled artisans to explore modern material uses and ancient decorative arts.

Our experienced teachers have instructed artisans both in Italy and abroad, also in prestigious institutions like the Scuola di Restauro of Vicenza and the Hamlet School of Hillerod in Denmark.

We think green

We consider beauty and health to be intrinsically connected. This perspective guides the development of decorative materials that combine visual quality with attention to people and the environment, prioritising natural and sustainable ingredients whenever possible.

Our environmental commitment:

- Our Mineral plasters are naturally resistant to mould, breathable, durable, and **VOC-free**;
- We provide a **Green Line** of products that consist solely of natural, sustainable ingredients;
- We are members of the **Green Building Council**;
- Our Mineral plasters incorporate **up to 45% recovered materials**.

Proudly member of the
Green Building Council
