

Document type **Technical Data Sheet**

Name	THIXO ADDITIVE
Description	This thixotropic additive is ideal for creating decorative finishes such as Lava Craters, Marmorino Hammered, or other three-dimensional effects with lime plasters. It enhances the thixotropic properties of the plaster, meaning it becomes thicker and more stable when at rest while remaining fluid and workable under agitation. Importantly, this is not the same as increasing density. Instead, the additive ensures the plaster holds its shape once applied, making it perfect for achieving intricate effects that would be impossible with a more fluid material.
Composition	A blend of mineral additives.
Appearance	Beige-white powder
Packaging	160g polyethylene jar
Application	This additive can be mixed into any lime-based plaster to enhance its thixotropic properties, which means improving its viscosity under agitation and stability at rest, making application easier and more controlled.
Where to use it	All lime-based plasters of STUCCO ITALIANO
Dilution	Ready to use
Consumption	160 g for every 24 kg of lime-based product
Shelf life	24 months when stored according to the recommended guidelines
Storage	In original sealed packaging between 5° and 35°C in a dry, dark environment
Disposal	Product must be disposed of according to norms and regulations in force.
Application Instructions	Add one 160g jar to 20-24kg of plaster. Introduce it while vigorously mixing with a medium/high-power mixer, sprinkling it evenly to avoid clumping. Water addition is not required but a bit can be added if necessary. The additive does not alter the colour of the material.
Tools	Electric mixer. Clean tools with water after use.

We have drawn up the material presented above to the best of our technical and experiential knowledge. Nevertheless, our suggestions and recommendations are not guaranteed. All responsibility for the obtained results lies solely with the method and conditions adopted for the application of the product. Such indications constitute valid support for verifying the product's suitability for the specific case. We reserve the right to make modifications to the present information without previous warning.
